ATS Scoring Report

Candidate: Alexandra Chen

Rubric preset: Software Engineer

Generated: 7/6/2026, 9:48:36 AM

82 / 100

ATS score

RECOMMENDATION

Hire

Rubric: Software Engineer

Why

Skills and experience dimensions carry the score with strong depth in the required stack and demonstrable production impact; education weight is small so its lower score has minimal effect.

Scoring breakdown

Skills

88/100 · weight 40% · +35.2 pts

Deep coverage of required backend and frontend stack including TypeScript, Go, and Kubernetes; some gaps around mobile frameworks and native tooling that the role occasionally touches.

Experience

85/100 · weight 35% · +29.8 pts

8 years across fintech and healthcare with clear progression from IC to tech lead; multiple production launches described with measurable outcomes.

Education

70/100 · weight 5% · +3.5 pts

BS Computer Science from a well-regarded program; no advanced degree but coursework and continuous learning are evident.

Impact

78/100 · weight 20% · +15.6 pts

Multiple bullets quantify impact (e.g., cut checkout latency 40%, reduced infra spend 22%); a few roles list responsibilities without measurable results.

Summary

Senior full-stack engineer with 8 years experience building scalable distributed systems and leading small teams across fintech and healthcare startups.

Strengths

- Strong systems background
- Shipped production ML infra
- Led migration to microservices

Weaknesses

- Limited mobile experience
- No formal PM training

Skills

Technical: TypeScript, React, Node, Go, PostgreSQL, Kubernetes, GraphQL, Redis

Tools: Docker, AWS, Terraform, Datadog

Soft: Communication, Leadership, Mentoring

Job fit

Match score: 76/100

Matching: TypeScript, React, PostgreSQL, AWS

Missing: Rust, gRPC

Candidate matches most core requirements; gaps in Rust and gRPC can be addressed with ramp-up given systems background.
